Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7, 10, and 12-27 are rejected under 35 U.S.C. 102(b) as being anticipate by Niino et al ("Surface modification of poly(tetrafluoroethylene) by excimer laser processing: enhancement of adhesion", Applied Surface Science v109/110, p259-263, 1997) or Kuper et al ("Ablation of Teflon with femosecond UV excimer laser pulses", Applied Physics Letter, v54 n1, p4-6, 2 Jan 1989). The prior art discloses the laser treatment for surface modification of Teflon. Since Applicant is using the same approach to modify the Teflon surface, it is the examiner's position that the claimed microstructure of the Teflon surface would be expected to be inherently present in the Teflon surface of Niino or Kuper.
